

CYBERSÉCURITÉ

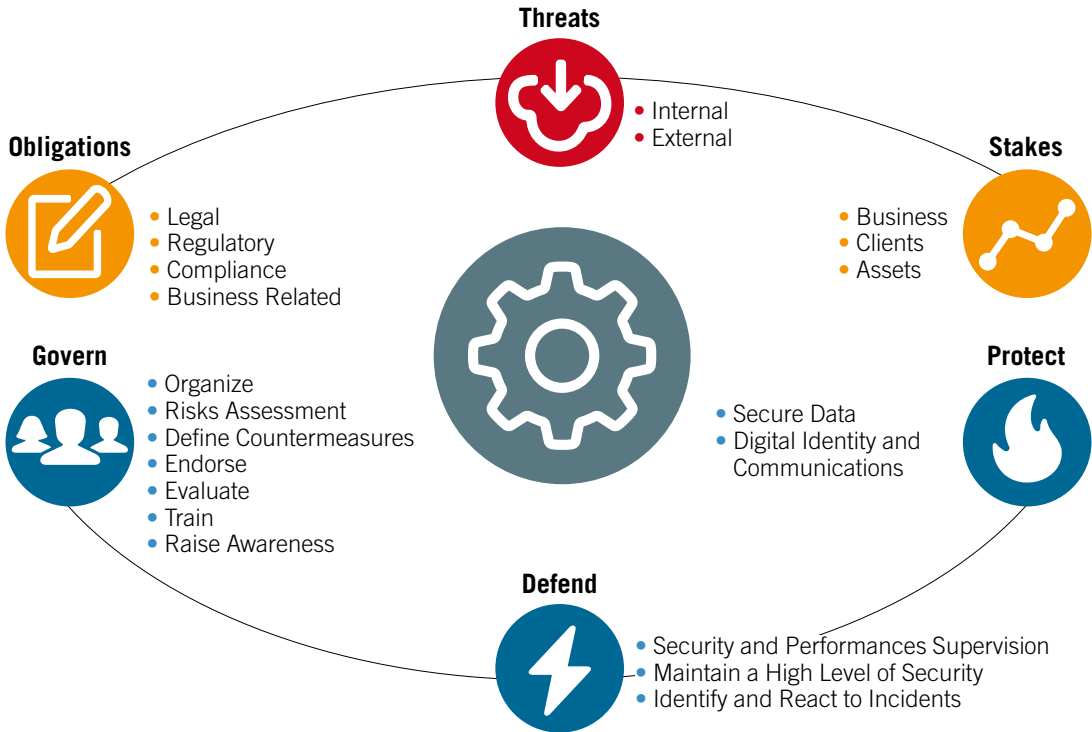

CS, your trusted partner to **protect your information systems**

DESIGNER, INTEGRATOR, OPERATOR OF MISSION-CRITICAL SYSTEMS

VOS ENJEUX

In today's world, **the information age has launched a digital revolution** in which every company is seeking to benefit from the great opportunities it brings. In parallel, as cybercrime thrives, all organizations must reinforce the means to protect, defend and ensure their information and communication systems become more and more resilient. CS addresses the needs of its clients by proposing a robust portfolio of security solutions acknowledged in the fight for cybercrime.

CS offers a full range of strong security solutions and products, entirely designed and developed in France. Our services include consulting on inception of secured infrastructures to Information Systems Security maintenance, crisis management and forensics. **CS guides companies** on the entire value chain by deploying innovative security solutions for an end-to-end protection of information systems and communication infrastructures.

POSITIONING & STRENGTHS

- ✔ A global approach in Information Systems Security (ISS)
- ✔ Operate on the entire value chain: consulting, integration, services, solutions
- ✔ Raising awareness and training capabilities
- ✔ A dedicated team of 150 experts and engineers
- ✔ EAL 3+ certified products which have been awarded the French Cybersecurity label
- ✔ The CERT-CS support
