Sales from the Build Activities came to €126.9 million, up 0.3% at same scope. CS increased its sales to the aerospace sector during the half, and booked higher orders, notably with Thales and Airbus in the areas of on-board systems, technical information systems and optimization of simulation codes. CS strengthened its sales outside France, with a 36.6% increase, notably in North and South America.

The Run Activity posted sales of €47.2 million for the first half of 2006, a 3.3% increase over the second half of 2005 that confirmed the trend observed in the first quarter. Moreover, orders booked by the Run activity were up by more than 30%, thanks to its positioning in the management of IT and network infrastructure.

The group had a book-to-bill ratio (orders taken/sales) of 1.05 in the first half of 2006.

On July 1, CS set in place a new organization with two divisions: "Mission Critical Systems" (approximately 60% of sales and a staff of 1,800) and "Mission Critical Infrastructures" (approximately 40% of sales and a staff of 1,400). This new organization will be clearer for CS's clients, and will enable the group to respond more effectively to their needs and concerns.

As planned, the group expects its operating margin for the first half of 2006 to be higher than it was for the first half of 2005.

The group will present its half yearly results on September 18, 2006.
